Over 1,500 services available to primary care providers through HealthPathways

HealthPathways is a one-stop-shop platform and is already home to hundreds of services designed to help support primary care providers in Burlington.

The regional HealthPathways directories from Burlington, Greater Hamilton and Middlesex London have combined listings of over 1500 services, highlighting the wide range of services available.

- Middlesex London: 544 services
- Burlington: 441 services
- Greater Hamilton: 688 services

HealthPathways testimonials

“

One of the biggest challenges in our healthcare system is finding ways to increase awareness of preventative health programs so that physicians can refer their patients early in their journey with chronic diseases. I become involved with the Community HealthPathway development with the goal of helping physicians find these resources and refer their patients to health education and other early interventions offered by allied health professionals that can make a big difference in patients' lives.

*Tracy Bonifacio
Respiratory Educator & Registered Respiratory Therapist Burlington
FHT & Caroline FHT*

“

Recently, in a neighbourhood community clinic a patient presented with a complaint of sore feet. Once seen it was clear that the problem was more complex. The patient was not in acute distress and wanted to avoid going to the ER.

The diagnosis of Heart Failure was made and next step was to go to Community Health Pathways and the Ontario West pathway on Heart Failure.

Healthpathways was so useful to review red flags, initiating treatment and planning follow up. The pathways are nicely laid out in a consistent manner, are easily searchable and available for any practicing clinician and provide localized resources for investigations, consultations and other referrals.

I look forward to more pathways being available.

Dr. Mike Pray

“

My experience has been that it has been intuitive to navigate through the site, not nearly as intimidating to start using as I thought it would be. Very useful to have access to local resources at your fingertips alongside clinical guidance.

*Dr. Allison Henderson
London InterCommunity Health and South Huron Hospital ER*

Planned Pathways for Phase 2
